Power BI & Python Analytics | Supply Chain Domain

LogiTrack Pro - Supply Chain Dashboard

Complete Setup & Deployment Guide | Author: Manish Patil

01. Project Files Required

You need exactly 2 files in the SAME folder on your PC:

Main File:	logitrack_dashboard.py (the Python Streamlit app)
-------------------	---

Dataset:	supply_chain_2024_25.csv (200 rows, 24 columns)
-----------------	---

02. Install Libraries (One Time Only)

Open CMD and run this command once:

```
pip install streamlit pandas plotly
```

sqlite3 is built into Python - no install needed.

03. Run on Your PC Locally

1 Open CMD (Windows: Start -> type 'cmd' -> Enter)

2 Go to the folder where you saved the files:

```
cd Downloads
```

3 Run the dashboard:

```
streamlit run logitrack_dashboard.py
```

4 Dashboard opens in browser automatically at:

```
http://localhost:8501
```

Keep CMD open while using dashboard. Press Ctrl+C to stop the server.

04. Run via Google Colab (Create File Method)

Colab cannot run Streamlit directly. Use this method to create the file, then run on PC:

Step 1 - Upload dataset to Colab:

```
from google.colab import files
files.upload() # upload supply_chain_2024_25.csv
```

Step 2 - Write dashboard code to file:

```
%%writefile logitrack_dashboard.py
# paste the full dashboard.py code here
```

Step 3 - Download the .py file:

```
from google.colab import files
files.download('logitrack_dashboard.py')
```

Step 4 - Open CMD on PC and run:

```
streamlit run logitrack_dashboard.py
```

05. Upload to GitHub

- 1 Create free account at: github.com
- 2 Click '+' -> 'New repository' -> Name it: logitrack-pro
- 3 Click 'uploading an existing file'
- 4 Drag & drop: logitrack_dashboard.py + CSV + README.md
- 5 Click 'Commit changes' -> Code is now live on GitHub!

Your GitHub URL: <https://github.com/YourUsername/logitrack-pro>

06. Get Free Live Link - Streamlit Cloud

Get a public URL for your resume completely free!

- 1 Go to: share.streamlit.io
- 2 Click 'Sign in with GitHub'
- 3 Click 'New app'
- 4 Repository: select 'logitrack-pro'
- 5 Main file path: `logitrack_dashboard.py`
- 6 Click 'Deploy!' - wait 2-3 minutes

Your live link will look like:

```
https://manishpatil-logitrack-pro.streamlit.app
```

Add this link to your resume under Projects section!

07. Dashboard Pages Reference

Overview	Revenue, Lead Time, Delays, Quality Trend charts, Status split
Delivery	Delay rate by mode, Monthly delays, Lead by category
Cost	Revenue vs freight, Monthly revenue, Payment terms
Suppliers	Top 8 suppliers, Quality ratings, City distribution
Warehouse	Orders vs delays, Revenue split, Category mix

08. Interview Talking Points

When asked about this project in interviews, say:

'I built a supply chain analytics dashboard using Python and Streamlit. The dashboard uses in-memory SQLite for 12+ SQL queries to compute KPIs like delay rates, freight ratios, and quality scores. I used Plotly for interactive charts, and Streamlit session state for multi-page navigation with page-specific filters. Pure Python - no HTML files needed.'

09. Troubleshooting

ModuleNotFoundError	Run: <code>pip install streamlit pandas plotly</code>

LogiTrack Pro - Supply Chain Dashboard

Complete Setup & Deployment Guide | Author: Manish Patil

FileNotFoundError

CSV and .py file must be in the SAME folder

Port 8501 in use

Add --server.port 8502 to the command

Colab dark screen

Normal - Colab cant run Streamlit, use PC instead

CMD path error

Type full path: cd C:\Users\YourName\Downloads
